

Herbicide-resistant weeds continue to limit soybean yield, minimizing grower return on investment and profitability potential. New soybean traits with tolerance to dicamba herbicide are available to help growers manage herbicide-resistant weeds.

DuPont Crop Protection and DuPont Pioneer are working together to offer soybean growers new herbicide and trait solutions to optimize weed control. The Roundup Ready 2 Xtend® Acre Solution partners innovative seed and herbicide technology with support from local agronomy experts to boost soybean yield on every acre.

Pioneer® brand soybeans with Roundup Ready 2 Xtend® technology

DuPont Pioneer is offering new high-yielding soybean varieties with Roundup Ready 2 Xtend® technology. These elite genetics have been field-tested in plots across the U.S.

DuPont™ FeXapan™ herbicide plus VaporGrip® Technology

DuPont Crop Protection introduced DuPont FeXapan™ herbicide plus VaporGrip® Technology, a low-volatility dicamba herbicide for in-crop use on Roundup Ready 2 Xtend® soybeans and cotton.

The Roundup Ready 2 Xtend® Acre Solution is an advanced weed management program that includes a soybean trait that allows in-crop application of dicamba herbicide. The new herbicide technology brings a new mode of action for control of resistant weeds in soybeans.

The Roundup Ready 2 Xtend® Solution provides broad-spectrum broadleaf weed control, including herbicide-resistant Palmer amaranth, waterhemp and marestail.

Addressing Any Concerns

DuPont asks that any growers with questions and concerns, contact their applicator or dealer where the product was purchased. Then the dealer should contact their local DuPont Crop Protection representative.

From that point, DuPont will investigate any customer inquiries we receive on a case-by-case basis.

If we identify any potential issues, including any that potentially may be related to off-target movement, DuPont will work with the customer to truly understand the root cause.

Commitment to Stewardship

DuPont Crop Protection and DuPont Pioneer are committed to helping to ensure appropriate stewardship of these innovative technologies so they remain available to farmers to manage resistant and tough-to control weeds.

We continue to offer stewardship education to our employees, reps and customers in meetings, training sessions and on-line at www.fexapan.dupont.com.

Growers, dealers and applicators should also visit www.fexapanapplicationrequirements.dupont.com for detailed information needed when utilizing these technologies.

Always read and follow all label directions and precautions for use.

Some products are not available for sale or use in all states. See your local DuPont sales representative or retailer for details on availability.
